

Assignment 1 (Day 2)

1. What is a computer?

Answer :- A computer is an electronic device that stores and processes data, often in binary form, in accordance with commands from a variable programme.

2. What is RAM?

Ans → Random Access Memory is a volatile memory. The operating system and other files are frequently loaded from an HDD or SSD into RAM when the computer is restarted.

3. Where is data stored in a computer?

Ans Hard Disk

4. What is that input device used to type text and numbers on a document in the computer system?

Answer → Keyboard

5. What are output devices?

Ans An output device is any piece of computer hardware that converts information into a human perceptible form or, historically, into a ~~physically~~ physical readable form for use with non-computerized equipment.
Example → monitors, printers, speakers, etc.

(6) Which input device allows a user to move to a cursor or pointer on the screen?

Answer — Mouse

7. Which language is directly understood by computer without a translation program?

Answer Binary Language

Q. What are input devices?

Answer An input device is a term for physical piece of hardware that connects to a primary device such as a computer, in order to provide user input.

Example - Keyboard.

Mouse devices
